Project Title: Noah Kahan Website

1. **Project overview**
    a. The goal of my website is to be informational over the life and music of Noah Kahan, focusing on his life through albums, and also building towards his work on the busyhead project
2. **Resources**
    a. The main source will be https://en.wikipedia.org/wiki/Noah_Kahan, along with other pictures that will sourced as they are found and used.
3. **Audience**
    a. This is mainly an informational website, so the audience can be wide spread. When it comes to the main demographic of Noah Kahan's music, it tends to mainly be young adults and college students, so this website will account for that likely main audience.
4. **Message**
    a. This website should focus on how his music built up to his busy head project and his struggles with mental health. His music connects to people from the honesty in the lyrics, and the busyhead project is meant to end

the stigma of mental health, so this website should highlight those parts of his life.

5. **Tone**
    a. The tone of this website should be empowering and moving. The focus on the more serious aspects of his career should help convey the importance of his non-profit and the way his music promotes it further.
6. **Visual Style**
    a. The style of this website is earthy and rustic, with a focus on the wilderness in style. It will be a lot of browns, greens, and greys, following the colors of his albums. I'm picturing a very woodsy front page, possible with animations of the tree moving, and more simplistic pages based off of what album or project the page is covering.

       The albums I'll be referencing are below:
